

cl 2
B,
a cover detachably attached to the upper portion of the body and covering said opening, said cover having a flat side surface extending away from the body and a plurality of projections on said flat side surface.

2. (Amended) The detergent container with a massage brush according to Claim 1, wherein said opening is positioned in a substantially center portion of the upper portion of said body and has an inner cover removably covering the opening.

3. (Amended) The detergent container with a massage brush according to Claim 1, further comprising a side cover configured to cover said flat side surface having said plurality of projections.

4. (Amended) The detergent container with a massage brush according to Claim 1, wherein said body and said cover forms a unitary body when fitted together.

a
5. (New) The detergent container with a massage brush according to Claim 1, wherein said plurality of projections is configured to massage a scalp and comprises a material selected from the group consisting of styrene butadiene rubber, ethylene propylene rubber, a blend of nitrile rubber and polyvinyl chloride, chloroprene rubber, and chlorosulfonated polyethylene rubber.

6. (New) The detergent container with a massage brush according to Claim 1, wherein said plurality of projections each have a round tip portion having a curvature radius between 0.5 mm to 4 mm, a base portion having a diameter between 5 mm and 10 mm, and a height between 8 mm and 12 mm.

7. (New) The detergent container with a massage brush according to Claim 1, wherein said plurality of projections has a density between 0.5 and 2.0 projections per cm² on the flat side surface.

8. (New) A shampoo container comprising:

ck
B2
a body configured to contain a shampoo therein and having an opening for the shampoo in an upper portion thereof; and

a cover detachably attached to the upper portion of the body and covering the opening, the cover having a flat side surface extending away from the body and a plurality of projections on the flat side surface, the plurality of projections being positioned to facilitate massaging of a scalp.

9. (New) The shampoo container according to Claim 8, wherein the opening is positioned in a substantially center portion of the upper portion of the body and has an inner cover removably covering the opening.

GA
10. (New) The shampoo container according to Claim 8, further comprising a side cover configured to be attached to the flat side surface and cover the plurality of projections.

11. (New) The shampoo container according to Claim 8, wherein the body and cover forms a unitary body when fitted together.

12. (New) The shampoo container according to Claim 8, wherein the plurality of projections comprises a material selected from the group consisting of styrene butadiene rubber, ethylene propylene rubber, a blend of nitrile rubber and polyvinyl chloride, chloroprene rubber, and chlorosulfonated polyethylene rubber.

13. (New) The shampoo container according to Claim 8, wherein the plurality of projections each have a round tip portion having a curvature radius between 0.5 mm to 4 mm, a base portion having a diameter between 5 mm and 10 mm, and a height between 8 mm and 12 mm.

14. (New) The shampoo container according to Claim 8, wherein the plurality of projections has a density between 0.5 and 2.0 projections per cm² on the flat side surface.

5/B3
15. (New) A scalp massaging kit comprising:

chk
B3
a detergent containing 0.1 to 10 parts by weight of a cationic polymer, 1.0 to 50 parts by weight of a nonionic surface active agent, 1.0 to 50 parts by weight of an alcohol, and water in an amount making 100 parts by weight; and

a detergent container having a body and a cover, the body being configured to contain the detergent therein and having an opening for the detergent in an upper portion thereof, the cover being detachably attached to the upper portion of the body, covering the opening, and having a flat side surface extending away from the body and a plurality of projections on the flat side surface, the plurality of projections being positioned to facilitate massaging of a scalp.

16. (New) The scalp massaging kit according to Claim 15, wherein the cationic polymer comprises at least one compound selected from the group consisting of cationic cellulose, a homopolymer of a diallyl quaternary ammonium salt, a diallyl quaternary ammonium salt/acrylamide copolymer, a quaternized polyvinylpyrrolidone derivative, cationic hydrogel, and a cationic group-containing copolymer obtained by radical polymerization of a monomer mixture including a cationic group-containing vinyl monomer, a hydrophilic nonionic group-containing vinyl monomer, and a cross-linking vinyl monomer having a plurality of vinyl groups per molecule.

17. (New) The scalp massaging kit according to Claim 15, wherein the nonionic surface active agent comprises at least one compound selected from the group consisting of polyoxyethylene alkyl ethers, polyoxyethylene hydrogenated castor oil, polyoxyethylene sorbitan fatty acid esters, higher fatty acid (C₁₀-C₂₄) glycerol esters, alkylamine oxides, and alkyl saccharides.

18. (New) The scalp massaging kit according to Claim 15, wherein the alcohol comprises at least one alcohol selected from the group consisting of ethanol, propylene glycol, butylene glycol, polyethylene glycol, glycerol, and sorbitol.

19. (New) The scalp massaging kit according to Claim 15, wherein the plurality of projections each have a round tip portion having a curvature radius between 0.5 mm to 4 mm, a base portion having a diameter between 5 mm and 10 mm, and a height between 8 mm and 12 mm.

20. (New) The scalp massaging kit according to Claim 15, wherein the plurality of projections has a density between 0.5 and 2.0 projections per cm² on the flat side surface.

IN THE ABSTRACT

Please delete the current text for the abstract of the disclosure and substitute therefor a new text as follows:

A detergent container with a massage brush including a body configured to contain a detergent therein and having an opening for the detergent in an upper portion thereof, and a cover detachably attached to the upper portion of the body and covering the opening, the cover having a flat side surface extending away from the body and a plurality of projections on the flat side surface.

REMARKS

Favorable reconsideration of this application, as presently amended and in light of the following discussion, is respectfully requested.

Claims 1-20 are presently pending in this application, Claims 1-4 having been amended and Claims 5-20 having been newly added by the present amendment.
